

THE GIANT COLOMBIAN BERRY. (*RUBUS MACROCARPUS* BENTH.; S. P. I. No. 51401.)

These berries, which are here shown natural size, are possibly the largest fruited of all known blackberries; and their introduction by Mr. Popenoe should stimulate work in selecting and crossing to produce, if possible, larger and finer forms of blackberries for American markets. (Photographed by Wilson Popenoe, El Penon, Colombia, October 16, 1920; P18152FS.)
